An Economic History of the World Since 1400

Aimled at the layperson with only a cursory understanding of the field, this book reveals how economics has influenced (and been influenced by) historical events and trends, including the Black Death, the age of exploration, the Industrial Revolution, the European colonization of Africa, the collapse of the Soviet Union, and the birth of personal computing. Professor Harrell has crafted a riveting, centuries-long story of power, glory, and ideology that reveals how, in step with history, economic ideas emerged, evolved, and thrived.
